

REMARKS

Responsive to the Examiner's Amendment dated July 27, 2006, the Applicant presents the following clarifying amendment. That is, the Examiner suggests changing the last line of claim 23 (presented earlier as "side angle in opposite directions relative to said center line") with the phrase "same side of the centerline are angled in opposite directions relative to said centerline and each other." However, if you replace the last line of the claim as suggested, and read it with the prior line (which is written as "said centerline, wherein an innermost transducer and an outermost transducer on said same"), you get "on said **same same** side of the centerline" In other words, you get two instances of the word "same."

To avoid this, the undersigned called Examiner Mancho and was directed to his supervisor. The supervisor (Jack Keith 571-272-6878), however, never returned any phone calls. Thus, these remarks are written to ensure the foregoing confusion is avoided in the issued patent. Claim 23 is also amended from the time of entry after the Examiner's amendment.

No fees are believed due with this response, but to the extent necessary, the undersigned authorizes necessary fees to be withdrawn from Deposit Account No. 11-0978. The undersigned also invites an Examiner phone call to clarify any questions. It is expected the issue fee will be paid shortly hereafter, before the deadline of October 27, 2006.

Respectfully submitted,

KING & SCHICKLI, PLLC
